

HPD UNIQUE IDENTIFIER: 25814

CLASSIFICATION: 12 52 13 Chairs

PRODUCT DESCRIPTION: First built for use on submarines in 1944, the Navy Chair has been in continuous production ever since. With the famous 77 step Process, our craftsmen take soft, recycled aluminum, hand form and weld it- then temper it for strength. Finally, the chair is anodized for a durable finish. We guarantee the Navy Chairs for life. This record covers all chairs and stools in the 1104 Navy Collection. Seats are available in walnut, cherry, or ash wood, with and without arms.

## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-2-standard](http://www.hpd-collaborative.org/hpd-2-2-standard)
