Rub'R Nek External Joint Wrap by Henry Company

Health Product Declaration v2.3

created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 39228889384960
CLASSIFICATION: 07 13 52 Modified Bituminous Sheet Waterproofing
PRODUCT DESCRIPTION: RU116 - RUBR-NEK EXTERNAL JOINT WRAP is an easy to apply protective film that self heals against punctures and has excellent mechanical strength, abrasion resistance and dimensional stability. This protective wrap has been carefullyconfigured for ease of application by hand and to provide an effective and long term seal for a wide range of concrete joints. RU116 - RUBR-NEK EXTERNAL JOINT WRAP is an elastomeric based product. It is produced by a unique manufacturing process which blends, extrudes and bonds synthetic elastomers and resins to a high strength plastic film. It is provided with a backing separator sheet for easy handling while keeping the bonding surface fresh and free of debris, and is removed during application

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and

for compliance with the HPD standard noted.
