

HPD UNIQUE IDENTIFIER: 1887431680

CLASSIFICATION: 10 51 13 Metal Lockers

PRODUCT DESCRIPTION: Founded in 1975, LINCORA specializes in manufacturing premium standard and custom all-welded steel lockers. We have developed a unique CONFIGURATOR that empowers us to assist you at the early stages of your project's design phase. Our advisory approach in combination with the configurator provides 3 main benefits: 1. Design Your Ideal Locker Solution**: Create a customized locker that meets all your users' storage needs. 2. Maximize Your Space: Adapt the locker dimensions (available in 1/8-inch increments for width, depth, and height) to fit your environment perfectly. 3. Achieve a Cohesive Look: Choose from our 12 standard colors or select any color code from Pantone, RAL, or any paint manufacturer, including Sherwin-Williams, Benjamin Moore, and Behr.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:
Antimicrobial Pesticides Reporting: This product does not contain substance(s) that are intentionally added above the [Product - 1,000 ppm] threshold to act as antimicrobials.

Special Conditions applied: [BiologicalMaterial]

HPD prepared using a Nested Materials Inventory with a product threshold at 1000 ppm. The content inventory includes 50 series and Tactical series. These products don't contain materials with Special Conditions (biological material and reaction products, defined substances, recycled content - mixture), except a wood plank as component of Tactical serie products . Substances present in Lincora, as well as known residuals and impurities, have been disclosed at 1000 ppm. Some ingredients are alternative ingredient in the same component. Some ingredient are not disclosed because they are proprietaries. More details about how residuals and impurities were considered available in the appropriate sections.

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Founded in 1975, LINCORA is a manufacturer of premium all welded standard and custom lockers. Premium means, among other things, that it is common to see 30 or 35 years old LINCORA lockers that are still structurally efficient. Lockers are needed in virtually every facility and often are the only personal space an employee would have at work. We therefore believe that it is important to ensure that the lockers provided by the employer allow a better organization of storage and properly meet the employees' needs.

Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and
