

HPD UNIQUE IDENTIFIER: 302772559872

CLASSIFICATION: 09 30 00 Tiling

PRODUCT DESCRIPTION: Complete Contact™-LFT Rapid Setting Mortar is a polymer modified, full contact medium bed mortar, specifically designed for floors, that has a rapid curing formula that allows grouting in as little as 2 hours, and light foot traffic in 4 – 6 hours; commercial traffic in 24 hours. Excellent for large format tile and stone, Complete Contact™-LFT Rapid Setting Mortar is suited for thin and medium bed applications up to 3/4" (19mm), eliminating the need for back buttering. It offers full mortar transfer to the back of the tile. Unlike traditional thin-sets, Complete Contact™-LFT Rapid Setting Mortar is more fluid yet holds its ridges and supports the deeper notch trowel sizes required for larger tile. Exceeds ANSI A118.4F, A118.11 and ANSI A118.15F

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products

through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
