created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 891042816
CLASSIFICATION: 07 13 00 Sheet Waterproofing
PRODUCT DESCRIPTION: Waterproofing and Wrapping Products Co.Ltd. (INSUWRAP), a manufacturer of PVC waterproofing membranes is a 100% Saudi-owned company established in 1985. The plant was constructed and commissioned using State of Art Technology and Know-How from Germany. Since then, Sixty (60) million square meters of INSUWRAP PVC Waterproofing Membranes have been applied in the Kingdom of Saudi Arabia, the Gulf States, the Middle East, Africa, and Europe. Insuwrap PVC 2000 WM is a calendered extruded high polymer waterproofing membrane, (thickness 2.00 mm), not compatible with bitumen, manufactured following the highest International standards offering high physical properties and long-term durability. Insuwrap 2000 WM is manufactured using the best raw materials produced by SABIC.

INVENTORY AND SCREENING NOTES:

Waterproofing and Wrapping Products Co.Ltd. (INSUWRAP) worked with the HPDC Approved Preparer to confirm that all intentionally added ingredients, residuals and impurities were considered under the preparation of this HPD. This was accomplished by obtaining full formulation disclosure, including residuals and impurities, down to the 100 ppm threshold.

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and

for compliance with the HPD standard noted.
