HPD UNIQUE IDENTIFIER: 58632412
HPD UNIQUE PRODUCT ID: Not provided.
CLASSIFICATION: 07 41 13 Metal Roof Panels
PRODUCT TYPE: Ceiling Panels
Ceiling Panels, Acoustical
Ceiling Panels, Acoustical, Mineral Base
Ceiling Panels, Metal
Composite Ceiling Panels
Composite Wall Panels
Metal Ceiling Panels
Metal Wall Panels
Wall Panels
Exterior Roof Panels
Exterior Metal Roof Panels, Insulated

PRODUCT DESCRIPTION: This HPD report includes Lambda RR®,RW® & RWs® panels. The lambda series comprises factory-manufactured sandwich panels consisting of a non-combustible mineral wool core bonded between two profiled steel facings. Developed to combine outstanding thermal insulation with the highest levels of fire protection, lambda panels provide an optimum balance between energy efficiency, mechanical performance, sound insulation, and long-term durability. The product range is intended for wall and roof applications where enhanced thermal performance is required. For Lambda RW & RWs panels the CSI MasterFormat Classification is 07 42 13.19 Insulated Metal Wall Panels.

Section 1: Summary

Nested Method / Product Threshold

CONTENT INVENTORY

Inventory Reporting Format
→ Nested Materials Method

Threshold Disclosed Per
→ Product

Threshold Level
→ 100 ppm

Residuals/Impurities Evaluation
Completed in **3** of **3** Materials

Explanation(s) provided for Residuals/Impurities?
Yes

For all contents above the threshold, the manufacturer has:

Characterized Yes
Provided weight and role.

Screened Yes
Provided screening results using HPDC-approved methods.

Identified No
Provided name and CAS RN or other identifier.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

Materials listed as Undisclosed is done to preserve integrity of formula and maintain competitive advantage. All residuals and impurities within the threshold are included

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC Content data is not applicable for this product category.

COMPLIANCE *See Section 3 for additional listings.*

VOC emissions: CDPH Standard Method - Not tested

CONSISTENCY WITH OTHER PROGRAMS

Pre-checked for LEED v4 Option 1.
Pre-checked for LEED v4.1 Option 1.
Pre-checked for LEED v5 Human Health 1.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 3.0, available on the HPDC website at: www.hpd-collaborative.org/hpd-3-0-standard

UNDISCLOSED **%: 30.8000 - 77.6300**

PRODUCT THRESHOLD: 100 ppm | RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes | MATERIAL TYPE: Geologically Derived Material

RESIDUALS AND IMPURITIES NOTES: Residuals and Impurities are determined based on information provided in supplier documentation and quality inspections by the appropriate company department. All residuals and impurities within the threshold are included.

OTHER MATERIAL NOTES: Variation in Content declaration (min-max) is over 20%. It is allowed due to paragraph 3.1.1 "Multiple Products with Content Differences Greater Than 10%". According to this chapter: There is no upper limit on content differences when multiple similar products are reported on a single HPD if:
● All other requirements in 3.1.0 Multiple Products in a Single HPD are met, AND Health Product Declaration
● The HPD uses a Nested inventory method, AND one of the following exceptions apply:
1. The variation in content beyond 10% is due to varying proportions of materials and substances (typically due to the same product being available in different sizes or shapes), and not due to varying composition of the product.
Example of allowed case:
Faced insulation products with varying thicknesses when the greater-than-10% difference is caused only by proportional differences between the insulation content and facing.

Section 3: Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

VOC EMISSIONS — **CDPH Standard Method - Not tested**

COMPLIANCE TYPE: Self-declaration
CERTIFIER/VERIFIER/TESTING LAB/AUDITOR: None
COMPLIANCE DETAILS:
COMPLIANCE SCOPE:
APPLICABLE FACILITIES: Facility in 2nd klm. Omorfochori-Agia str. , Larissa 41500, Greece
COMPLIANCE URL:
COMPLIANCE NOTES: MoT Panels hereby declares that the lambda products are currently undergoing laboratory testing for volatile organic compound (VOC) emissions by an accredited laboratory, in accordance with the CDPH Standard Method. The test results are pending and, until they are issued, the products are reported under HPD Open Standard v3.0 as “CDPH Standard Method – Not tested”, with the compliance type “Self-Declaration”. This declaration is temporary and does not constitute certification of low or zero VOC emissions. It will be updated once the laboratory test results have been issued.

ISSUE DATE: 2026-07-27

EXPIRY DATE: No expiration

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

SIKACRYL 621 FIRE
MANUFACTURER (OR GENERIC): **SIKA**

HPD URL: No HPD Available
ACCESSORY TYPE: Other
CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Fire proof sealant Sikacryl 621 FIRE, to be applied as strip into the panels’ joint.

Section 5: General Notes

Lambda RR® panels are roof covering self-supporting composite components, manufactured with non-combustible mineral wool with a minimum compressive strength of 50 kPa, enclosed by two steel shaped sheets. The external steel sheet is trapezoidally corrugated and the internal is slightly modulated, according to architect’ s choice. The minimum recommended slope is 5% for roofs covered by one piece panel & 7% for roofs covered by two or more pieces of panel. Further from roof covering, they can be also applied to side covering, installed both horizontally or vertically, providing unique aesthetics.

Lambda-RW® panels are self-supporting wall composite components with invisible joint, manufactured with non-combustible mineral wool with a minimum compressive strength of 50 kPa, enclosed by two steel shaped sheets. enclosed by two slightly modulated steel sheets, according to architect’ s choice. They are an excellent choice for external wall systems, whose invisible joint guaranties building envelopes with high aesthetic performance and fire protection. They are also ideally suited to internal partition walls of food or pharmacy industry, serving heavy wash down needs. Lambda-RW® panels can be installed both vertically and horizontally.

Lambda-RWs® panels are self-supporting wall composite components with visible joint, manufactured with non-combustible mineral wool with a minimum compressive strength of 50 kPa, enclosed by two slightly modulated steel sheets, according to architect’ s choice.
In combination with our high-quality flashings and the available prepainted fixing accessories, they offer an ideal solution for external wall systems and also internal partition walls, ensuring high passive fire protection in all options. lambda-RWs® panels can be installed both vertically and horizontally.

Variation in Content declaration (min-max) is over 20%. It is allowed due to paragraph 3.1.1 "Multiple Products with Content Differences Greater Than 10%". According to this chapter: There is no upper limit on content differences when multiple similar products are reported on a single HPD if:

- All other requirements in 3.1.0 Multiple Products in a Single HPD are met, AND Health Product Declaration
- The HPD uses a Nested inventory method, AND one of the following exceptions apply:

1. The variation in content beyond 10% is due to varying proportions of materials and substances (typically due to the same product being available in different sizes or shapes), and not due to varying composition of the product.

Example of allowed case:

Faced insulation products with varying thicknesses when the greater-than-10% difference is caused only by proportional differences between the insulation content and facing.

MANUFACTURER INFORMATION

MANUFACTURER: **MOT**
ADDRESS: **2nd klm. Omorfochori-Agia str.**
Larissa, Thessaly 41500
COUNTRY: **Greece**

WEBSITE: **www.motpanels.com**
CONTACT NAME: **Maria Karali**
TITLE: **Architect, NTUA**
PHONE: **+30 2410975140-1**
EMAIL: **m.karali@motpanels.com**

The listed contact is responsible for the validity of this HPD and attests that it is accurate and complete to the best of his or her knowledge.

KEY

Hazard Types

AQU Aquatic toxicity
CAN Cancer
DEV Developmental toxicity
END Endocrine activity
EYE Eye irritation/corrosivity
GEN Gene mutation
GLO Global warming
LAN Land toxicity
MAM Mammalian/systemic/organ toxicity
MUL Multiple
NEU Neurotoxicity
NF Not found on Priority Hazard Lists
OZO Ozone depletion
PBT Persistent, bioaccumulative, and toxic
PHY Physical hazard (flammable or reactive)
REP Reproductive
RES Respiratory sensitization
SKI Skin sensitization/irritation/corrosivity
UNK Unknown

GreenScreen (GS)

BM-4 Benchmark 4 (prefer-safer chemical)
BM-3 Benchmark 3 (use but still opportunity for improvement)
BM-2 Benchmark 2 (use but search for safer substitutes)
BM-1 Benchmark 1 (avoid - chemical of high concern)
BM-U Benchmark Unspecified (due to insufficient data)
LT-P1 List Translator Possible 1 (Possible Benchmark-1)
LT-1 List Translator 1 (Likely Benchmark-1)
LT-UNK List Translator Benchmark Unknown
NoGS No GreenScreen.

GreenScreen Benchmark scores sometimes also carry subscripts, which provide more context for how the score was determined. These are DG (data gap), TP (transformation product), and CoHC (chemical of high concern). For more information, see 2.2.2.4 GreenScreen® for Safer Chemicals, www.greenscreenchemicals.org, and Best Practices for Hazard Screening on the HPDC website (hpd-collaborative.org).

Recycled Types

PreC Pre-consumer recycled content
PostC Post-consumer recycled content
UNK Inclusion of recycled content is unknown
None Does not include recycled content

Other Terms:

GHS SDS Globally Harmonized System of Classification and Labeling of Chemicals Safety Data Sheet

Inventory Methods:

Nested Method / **Material Threshold** Substances listed within each material per threshold indicated per material
Nested Method / **Product Threshold** Substances listed within each material per threshold indicated per product
Basic Method / **Product Threshold** Substances listed individually per threshold indicated per product

Nano Composed of nano scale particles or nanotechnology
Third Party Verified Verification by independent certifier approved by HPDC
Preparer Third party preparer, if not self-prepared by manufacturer
Applicable facilities Manufacturing sites to which testing applies

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
