

HPD UNIQUE IDENTIFIER: 23131

CLASSIFICATION: 09 68 13 Tile Carpeting

PRODUCT DESCRIPTION: The marriage of a complex structured multi-level loop and digital colouration gives the Memory Ecotrust collection a unique expression. Memory Ecotrust comprises three designs, each in 9 architectural colours. The colour palette is structured around light, medium and dark tones, which can be used in combination to reflect the social aspect of the office space. Play with tonal range and accent colour to create neighborhoods, way-finding etc. Memory Ecotrust is available in 48x48 cm carpet tiles, 96x96 cm carpet tiles and as broadloom. Designed by Carol Appleton. The carpet tiles consist of Ecotrust felt backings and tile faces. The Ecotrust felt backings are produced from recycled water bottles. An innovative production technique turns bottles into a soft yet strong PET felt material that is long lasting and has great acoustic performance. At egetaepper we use Aquafil's Econyl yarns produced from used fishing nets. Once the fishing nets are collected and cleaned, they are physically and chemically broken down and reborn as strong and hardwearing yarns for carpets.

## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: [www.hpdc-collaborative.org/hpd-2-2-standard](http://www.hpdc-collaborative.org/hpd-2-2-standard)

## Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

## Section 5: General Notes

Residuals/impurities is not considered. The result is imported from Pharos process chemistry research.

*The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:*

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

*Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.*

*The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.*

*The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.*
