Synthesis by KI

Health Product Declaration v2.2
created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 23641
CLASSIFICATION: 12 51 00 Office Furniture
PRODUCT DESCRIPTION: Synthesis tables are available in a variety of top shapes and sizes. The clean, light base design is offered in three choices - cantilevered legs, wide legs and an X base. Convenient pin-height adjustability allows you to specify the table for various uses throughout a facility. Synthesis tables offer flexibility with fixed, folding or rolling styles available. Synthesis tables offer a discreet, integrated system to address vertical and horizontal wire management either under the table or behind the modesty panel. Table tops are available in laminate and wood veneer finishes with a variety of edge styles.

Section 1: Summary

Nested Method / Material Threshold

CONTENT INVENTORY

Inventory Reporting Format
- (•) Nested Materials Method
- ( ) Basic Method

Threshold Disclosed Per
- (•) Material
- ( ) Product

Threshold level
- ( ) 100 ppm
- (•) 1,000 ppm
- ( ) Per GHS SDS
- ( ) Other

Residuals/Impurities
Residuals/Impurities Considered in 4 of 5 Materials
Explanation(s) provided for Residuals/Impurities?
- (•) Yes ( ) No

All Substances Above the Threshold Indicated Are:
Characterized ( ) Yes Ex/SC (•) Yes ( ) No
% weight and role provided for all substances.
Screened ( ) Yes Ex/SC (•) Yes ( ) No
All substances screened using Priority Hazard Lists with results disclosed.
Identified ( ) Yes Ex/SC (•) Yes ( ) No
All substances disclosed by Name (Specific or Generic) and Identifier.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-2-standard

WOOD %: **51.5500 - 51.5500**

Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

VOC EMISSIONS — **Indoor Advantage Gold**

CERTIFYING PARTY: Third Party
APPLICABLE FACILITIES: KI Bonduel
CERTIFICATE URL: https://www.scscertified.com/products/cert_pdfs/KI_2015_NOC_SCS-IAQ-03107_s5.pdf?r=1

ISSUE DATE: 2015-07-08
EXPIRY DATE: 2016-07-07
CERTIFIER OR LAB: SCS Global Services

CERTIFICATION AND COMPLIANCE NOTES: Indoor Air Quality Certified to SCS-EC10.3-2014

MULTI-ATTRIBUTE — **BIFMA e3 - level 2**

CERTIFYING PARTY: Third Party
APPLICABLE FACILITIES: KI Bonduel
CERTIFICATE URL: https://www.scscertified.com/products/cert_pdfs/KI_2015_SCS-SCF-03507_s2.pdf?r=1

ISSUE DATE: 2015-12-16
EXPIRY DATE: 2016-12-15
CERTIFIER OR LAB: SCS Global Services

CERTIFICATION AND COMPLIANCE NOTES: Conforms to the ANSI/BIFM e3-2014e Furniture Sustainability Standards

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

CARE AND MAINTENANCE — HPD URL: **No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:
Recommended Cleaning Instructions - Laminate Tops To clean the laminate, use a mild solution of water and detergent. (Pine cleaner and warm water works very well). Wipe clean with a dry cloth. As a last resort, stubborn dirt or grease may be removed with a lacquer thinner or other solvent. Some stains such as grape juice may be removed by wetting the table surface and sprinkling lightly with baking soda, then wipe clean with a damp cloth. (Do not allow the baking soda to remain more than two minutes.) As always, thoroughly dry the surface with a dry cloth. Never use a harsh abrasive such as Comet cleanser, scrub pads, etc. to clean the surface. To maintain a bright attractive surface, occasionally apply a coating of wax (the same you would use on your home furniture) to the table top. Gouges and abrasions in the vinyl "Bull Nose" edging can be removed with "000" steel wool. Apply a light coating of liquid vinyl floor wax to restore the sheen. Never use a water hose or spray washer to clean a table. In the event a table becomes wet, as soon as possible thoroughly dry both sides of the top with a dry cloth. Excessive moisture will cause the particleboard core to swell the top and bottom, exposing the core behind the molding. The top will appear to grow in thickness. Recommended Maintenance Instructions - Table Frames It is recommended that frames be kept dry from water, rain, ice, snow and salt. To clean frames use warm water and a mild soap then dry thoroughly. Chrome frames can use chrome polish if additional cleaning is needed. Once clean and dry protect the coating with wax or something as equal. Wax polish retards corrosion by sealing the surface with a protective wax coat.

Section 5: General Notes

Final manufacture has no reportable chemical restrictions.

Section 6: References

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
