WPC with Pre-Attached Pad by CFL Flooring

Health Product Declaration v2.3

created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 1090428928
CLASSIFICATION: 09 65 00 Resilient Flooring
PRODUCT TYPE: Multi-Layer Resilient Flooring (Resilient)
PRODUCT DESCRIPTION: CFL's WPC Flooring offers a strong balance of comfort, durability, and waterproofness, making it well suited for both residential and commercial use. The rigid, waterproof core provides stability over uneven subfloors, while the built-in underlayment adds sound absorption and walking comfort. Unlike traditional vinyl or laminate, WPC combines a resilient surface with a thicker, more forgiving construction that reduces noise and impact underfoot. It is suitable for installation in kitchens, bathrooms, and basements, and performs well in areas with daily foot traffic. The surface layer is designed for easy maintenance and long-term wear resistance.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

Antimicrobial Pesticides Reporting: This product does not contain substance(s) that are intentionally added above the [Product - 100 ppm] threshold to act as antimicrobials.

Special Conditions applied: [BiologicalMaterial]

This Health Product Declaration (HPD) was completed in accordance with the HPD Standard version 2.3, and discloses hazards associated with all substances present at or above 100 parts per million (ppm) in the finished product, along with the role and percent weight.

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

PFAS DETAILS:

It has been **verified by a Third-Party** that this product does **not** contain intentionally added PFAS and materials and substances from suppliers are verified to **not** contain PFAS confirmed via **laboratory testing**

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

WPC WITH PRE-ATTACHED PAD

PRODUCT THRESHOLD: 100 ppm RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes

RESIDUALS AND IMPURITIES NOTES: No residuals or impurities are known or expected to be present at or above the Content Inventory Threshold indicated that have a GS score of BM-1, LT-1, LT-P1 or NoGS based on information provided in supplier disclosures and as predicted by process chemistry (Pharos CML).

OTHER PRODUCT NOTES: The WPC with pre-attached cork pad is manufactured in thicknesses ranging from 6.5 mm to 15 mm. Standard specifications include 5.5+1 mm, 6.5+1.5 mm, 8+2 mm, 10+2 mm, and 12+3 mm.

SUBSTANCE NOTES: ADCA is a foaming agent supplied in powder form. When heated, it undergoes thermal decomposition and releases gas, which causes the material to expand and foam. Due to its low boiling point and weak intermolecular forces, ADCA can easily transition from a solid to a gaseous state without leaving significant residue. A residue test report has been provided, confirming that ADCA is not detected in the final product. In addition, the manufacturer has implemented EMS and OHS policies to eliminate potential risks, and the supplier has established control measures to further manage them.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and

for compliance with the HPD standard noted.
