

HPD UNIQUE IDENTIFIER: 25030

CLASSIFICATION: 12 24 00 Window Shades

PRODUCT DESCRIPTION: This series features a sophisticated interwoven pattern of yarns in a broken twill-weave design. It is composed of sheer, fine polyester yarns with a PVC coating. The 6450 Series' nine neutral colors provide a complementary background element to a space. If the reverse side is to face the room interior, use the color number followed by the letter "R". Content: 75% PVC (coating), 25% polyester (yarn) Openness factor: approx. 3% (1% openness is available with minimum-quantity orders.) Stocked: 98 in. (249cm) wide (63 in./160cm, 78 in./198cm, and 118 in./300cm widths are available with minimum-quantity orders.) NFPA 701-2004: pass

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-2-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
