

HPD UNIQUE IDENTIFIER:

CLASSIFICATION: 12 52 13 Chairs

PRODUCT DESCRIPTION: In 2003, we came across a long lost Emeco chair. Dated 1951, the chair had a clean, simple, straightforward design. We decided it was time for a revival, and contacted Adrian van Hooydonk at BMW Designworks. Adrian designed an updated version that retains Emeco's DNA yet looks forward. The handmade aluminum frame has a new, more 'dynamic' stance, and is combined with a seat and back made from recycled plastic (rPET). For 2020, we've updated the color palette, offering 6 new colors - all suitable for outdoor use.

## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-3-standard](http://www.hpd-collaborative.org/hpd-2-3-standard)

### ALUMINUM FRAME

## Section 4: Accessories

*This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.*

No accessories are required for this product.

## Section 5: General Notes

We make chairs.

In America.

Often by hand.

Mostly from recycled stuff.

But always to last.
