## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-2-standard](http://www.hpd-collaborative.org/hpd-2-2-standard)

## Section 5: General Notes

**Mill Naming: Flexing Muscles.** Under a microscope, human muscles display a linear striation unique to anything else in human anatomy. Varying line weights create the illusion of multiple colors with a thread-like pattern. Printing on smooth, eco-friendly polyurethane portrays a strong linear pattern.
