HPD UNIQUE IDENTIFIER: 41280247
HPD UNIQUE PRODUCT ID: US-87-AF940, US-87-NF940
CLASSIFICATION: 07 95 13 Expansion Joint Cover Assemblies
PRODUCT TYPE: Fire Blankets
PRODUCT DESCRIPTION: Protect your building and the people inside from the spread of smoke and fire with the Fireline® 940 fire barrier. Our Fire Barriers are designed to block smoke, flames and heat in large joint openings. This helps contain the fire providing more time for evacuation and arrival of help. With a +/- 100% seismic rating, unlimited lateral shear capability, pre-attached metal flanges and factory made male/female ends - this system makes protecting your building from the spread of smoke and fire easier than ever before.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 3.0, available on the HPDC website at: www.hpd-collaborative.org/hpd-3-0-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
