

HPD UNIQUE IDENTIFIER: 10633323841536

CLASSIFICATION: 09 64 53 Resilient Wood Flooring Assemblies

PRODUCT DESCRIPTION: The NATURFLOOR-W Engineered Hardwood Flooring (NATURFLOOR-W) performance layer is a 1,3mm cladding of natural hardwood and kraft papers resin encapsulated with a proprietary process. The core is a 9 ply layered marine-grade premium birch plywood. NATURFLOOR-W flooring combines the natural integrity, feel and warmth of hardwood with outstanding technical advantages, leading to impeccable installation in commercial and residential spaces. Specifically designed for high-traffic environments such as hotels, offices, museums, airports, retail stores etc., it is also perfect for residential applications and ideally suited for installation over UFH systems. The water-resistant surface applied to our finishes and woods, enables NATURFLOOR-W floors to be installed in areas with frequent contact with water, along with a specification option for slip resistance. In line with our policy of continuous product development, under UNE EN 13329 Parklex NATURFLOOR-W has achieved Class 32 for commercial use and Class 23 for residential use; Class 2 for slip resistance, AC6 for wear resistance and Grade 4 for scratching resistance.

Special Conditions applied: [BiologicalMaterial]

Special Conditions applied: [Polymers]

Parklex Prodema USA, Inc. worked with the HPDC Approved Preparer to confirm that all intentionally added ingredients, residuals and impurities were considered under the preparation of this HPD. This was accomplished by obtaining full formulation disclosure, including residuals and impurities, down to the 100 ppm threshold.

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

Measure Concentration of Total Volatile Organic Compounds (TVOC): less than 0.5 mg/m3 (in compliance with CDPH/EHLB Standard Method v1.2-2017)		

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Parklex Prodema USA, Inc. worked with the HPDC Approved Preparer to confirm that all intentionally added ingredients, residuals and impurities were considered under the preparation of this HPD. This was accomplished by obtaining full formulation disclosure, including residuals and impurities, down to the 100 ppm threshold.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and
