**Pango® Claw**
by Stego Technology, LLC

**CLASSIFICATION:** 31 31 16

**PRODUCT DESCRIPTION:** Pango Claw is a multi-layered tape that is used to seal Pango Wrap along its terminating edges (interior and perimeter) to the slab while the concrete is placed. Pango Claw allows wet concrete to cast into the textured top surface to form a mechanical bond/seal. Pango Claw is composed of polyethylene film, aperture film, and an acrylic, pressure-sensitive adhesive. Additional CSI MasterFormat Designations: 07 26 00, 03 30 00.

**CONTENT IN DESCENDING ORDER OF QUANTITY**

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

**MATERIAL | SUBSTANCE | RESIDUAL OR IMPURITY | HAZARD TYPE**

**VOLATILE ORGANIC COMPOUND (VOC) CONTENT**

VOC Content data is not applicable for this product category.

**CERTIFICATIONS AND COMPLIANCE**

See Section 3 for additional listings.

Other: National Green Building Standard 2012 (ICC 700)

**CONSISTENCY WITH OTHER PROGRAMS**

No pre-checks completed or disclosed.

---

**INVENTORY AND SCREENING NOTES:**

*** Manufacturer has opted for the basic inventory display – chemical substances are listed by weight in the entire product instead of grouped by material. *** We have worked closely with our suppliers to ensure the least toxic ingredients are chosen while maintaining required performance characteristics.

Number of Greenscreen BM-4/BM3 contents........... 0
Contents highest concern GreenScreen Benchmark or List translator Score.......... LT-1
Nanomaterial............... No

**HPD v2.1 created via HPDC Builder Page 1 of 6**
## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold.
- Nested Material Inventory method with individual Material-level thresholds.

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-1-standard](http://www.hpd-collaborative.org/hpd-2-1-standard)

### PANGO™ SUBSTRATE ADHESIVE
- **Product Threshold:** Per GHS SDS
- **Residuals and Impurities Considered:** No
- **Residuals and Impurities Notes:** Residuals have not been quantified. Efforts are made to ensure that no undesired residuals or impurities remain in the final product, but no additional tests are undertaken to measure potential residual content.
- **Other Material Notes:** Variation in processing necessitates that a range of values be reported for this substance.

### ACRYLIC POLYMER
- **ID:** Undisclosed
- **%:** 90.0000 - 100.0000
- **GS:** UNK
- **RC:** None
- **Nano:** No
- **Role:** Base adhesive
- **HAZARDS:** None Found
- **Agency(Ies) With Warnings:** No warnings found on HPD Priority lists
- **SUBSTANCE NOTES:** The supplier has identified this substance as an acrylic polymer due to the fact that it is a proprietary component of the product and it represents a Trade Secret. To the best of their knowledge and research, there are no known hazards or warnings associated with this material. Variation in processing necessitates that a range of values be reported for this substance.

### ADDITIVE
- **ID:** Undisclosed
- **%:** 0.0000 - 10.0000
- **GS:** UNK
- **RC:** None
- **Nano:** No
- **Role:** Modifier
- **HAZARDS:** None Found
- **Agency(Ies) With Warnings:** No warnings found on HPD Priority lists
- **SUBSTANCE NOTES:** The supplier has only identified this substance as an adhesive additive due to the fact that it is a proprietary component of the product and it represents a Trade Secret. To the best of their knowledge and research, there are no known hazards or warnings associated with this material. Variation in processing necessitates that a range of values be reported for this substance.

### PANGO™ TAPE/CLAW™ SUBSTRATE
- **Product Threshold:** Per GHS SDS
- **Residuals and Impurities Considered:** No
- **Residuals and Impurities Notes:** Residuals have not been quantified. Efforts are made to ensure that no undesired residuals or impurities remain in the final product, but no additional tests are undertaken to measure potential residual content.
- **Other Material Notes:** Variation in processing necessitates that a range of values be reported for this substance.

### POLYETHYLENE
- **ID:** 9002-88-4
- **%:** 79.0000 - 100.0000
- **GS:** LT-UNK
- **RC:** None
- **Nano:** No
- **Role:** Bulk polymer
- **HAZARDS:** None Found
- **Agency(Ies) With Warnings:** No warnings found on HPD Priority lists
- **SUBSTANCE NOTES:** Variation in processing necessitates that a range of values be reported for this substance.

**HAZARDS:** None Found

**AGENCY(IES) WITH WARNINGS:** No warnings found on HPD Priority lists

**SUBSTANCE NOTES:** The supplier has identified this substance as a polyolefin due to the fact that it is a proprietary component of the product and it represents a Trade Secret. To the best of their knowledge and research, there are no known hazards or warnings associated with this material. Variation in processing necessitates that a range of values be reported for this substance.
Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

CERTIFICATION AND COMPLIANCE NOTES: PANGO® TERMITE DEFENSE SYSTEM (PANGO WRAP, PANGO TAPE, AND PANGO CLAW) MANUFACTURED BY STEGO TECHNOLOGY, LLC HAS BEEN CERTIFIED FOR POINTS TOWARD NGBS GREEN CERTIFICATION TO THE ICC 700 NATIONAL GREEN BUILDING STANDARD AS DETAILED IN NGBS GREEN CERTIFIED PRODUCT REPORT #NGBSGCP-00267; CERTIFICATE #00267. Pango Wrap is Home Innovation NGBS Green Certified. Four points can be earned for the NGBS under Termite Barrier (602.1.5) where a continuous physical foundation termite barrier with low toxicity and no chemical treatments are installed in geographical areas with subterranean termite infestation potential. Pango Wrap is Safe for the Environment.**

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Pango Wrap Termite/Vapor Barrier is a physical barrier against Formosan termites and moisture vapor. Through patented and trade secret processes, Pango Wrap combines uniquely designed barrier materials with the flexibility and strength of extruded, high-performance polyolefin film into an easy-to-install, physical barrier against subterranean termites. Pango Wrap comes from the creators of Stego Wrap Vapor Barrier, the most widely-specified below-slab vapor barrier in North America*. Unlike chemical sprays that do nothing to prevent other contaminants from entering the building, Pango Wrap is a high performance vapor barrier as well as a termite defense barrier. Combining these two solutions in one product saves time and labor costs during construction. Pango Wrap is made from game-changing resin technology and provides high performance and longevity. Alternatively, chemical spray solutions must be re-applied to have a chance of being effective long-term against aggressive, subterranean termites. Such termiticides are known to dissipate in effectiveness over time. Pango Wrap provides a long-term solution and may allow builders to greatly reduce or eliminate the use of chemical termiticides for below-slab termite control. || Other applicable CSI MasterFormat Sections include 07 26 00 and 03 30 00 || *Stego Industries, LLC is the exclusive Representative for Pango™ Wrap and accessory products, which are produced for Stego Technology, LLC, a wholly independent company from Stego Industries, LLC. || **Stego-defined terms defined at www.stegoindustries.com/legal || Stego, the stegosaurus design logo[s], Crete Claw, StegoTack, StegoCrawl, Beast, and the Beast design logo are all deemed to be registered and/or protectable trademarks or service marks of Stego Industries, LLC. The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation.
The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
