

CLASSIFICATION: 09 68 20 CARPETING - BROADLOOM CARPETING

created via: HPDC Online Builder

PRODUCT DESCRIPTION: HIGHLINE IS A TRULY UNIQUE CONCEPT BRINGING SPECIAL ATTENTION TO THE IMPORTANCE OF QUALITY AND FREEDOM OF DESIGN. THE CONCEPT CONSISTS OF TWO DIFFERENT TYPES OF TEXTILE FLOORING SOLUTIONS: BROADLOOM AND TILES. EVERY HIGHLINE SOLUTION CAN BE CREATED IN DIFFERENT QUALITIES TO MATCH YOUR BUDGET AND DEMANDS FOR WEAR-RESISTANCE, ACOUSTICS, COMFORT, INSULATION, FIRE RESISTANCE, ETC.

Section 2: Content in Descending Order of Quantity

This section lists materials in a product and the substances in each material based on the Inventory Threshold for each material. If residuals or impurities from the manufacturing or extraction processes are considered for a material, these are inventoried and characterized to the extent described in the Material and/or General Notes. Chemical substances are screened against the HPD Priority Hazard Lists for human and environmental health impacts. Screening is based on best available information; "Not Found" does not necessarily mean there is no potential hazard associated with the product or its contents. More information about Priority Hazard Lists and the GreenScreen can be found online: www.hpd-collaborative.org and www.greenscreenchemicals.org.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator, and when available, full GreenScreen assessments. The HPD Open Standard does not provide an assessment of health impacts throughout the product life cycle. It does not provide an assessment of exposure or risk associated with product handling or use. It also does not address potential health impacts of: (i) substances used or created during the manufacturing process unless they remain in the final product, or (ii) substances created after the product is delivered for end use (e.g., if the product burns, degrades, or otherwise changes chemical composition).

The HPD Open Standard was created and is maintained and evolved by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry. The HPD Collaborative is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

A disclosure completed in compliance with the HPD Open Standard is referred to as a "Health Product Declaration," or "HPD." The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD Open Standard noted.
