

CLASSIFICATION: 07 14 13.00

created via: HPDC Online Builder

PRODUCT DESCRIPTION: PARABIT SOLO HOT MELT MEMBRANE IS AN SBS MODIFIED BITUMEN WATERPROOFING MEMBRANE SPECIFICALLY INTENDED FOR INVERTED ROOF APPLICATIONS. USED IN CONJUNCTION WITH A REINFORCEMENT AND BITUMEN CAPSHEET, THE HOT APPLIED COMPOUND FORMS AN EXTREMELY DURABLE AND MONOLITHIC MEMBRANE WHICH IS FULLY BONDED TO THE SUBSTRATE.

Section 1: Summary

CONTENT INVENTORY

- | | |
|------------------------------------------|----------------------------------------------------------------|
| Threshold per material | Residuals and impurities considered in 1 of 1 materials |
| <input checked="" type="radio"/> 100 ppm | <input checked="" type="radio"/> see Section 2: Material Notes |
| <input type="radio"/> 1,000 ppm | <input type="radio"/> see Section 5: General Notes |
| <input type="radio"/> Per GHS SDS | |
| <input type="radio"/> Per OSHA MSDS | |
| <input type="radio"/> Other | |

Based on the selected Content Inventory Threshold:

- | | | |
|---------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Characterized..... | <input checked="" type="radio"/> | <input type="radio"/> |
| Are the Percent Weight and Role provided for all substances? | Yes | No |
| Screened..... | <input checked="" type="radio"/> | <input type="radio"/> |
| Are all substances screened using Priority Hazard Lists with results disclosed? | Yes | No |
| Identified..... | <input type="radio"/> | <input checked="" type="radio"/> |
| Are all substances disclosed by Name (Specific or Generic) and Identifier? | Yes | No |

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

Number of Greenscreen BM-4/BM3 contents..... 0
 Contents highest concern GreenScreen Benchmark or List translator Score..... LT-1

Section 2: Content in Descending Order of Quantity

This section lists materials in a product and the substances in each material based on the Inventory Threshold for each material. If residuals or impurities from the manufacturing or extraction processes are considered for a material, these are inventoried and characterized to the extent described in the Material and/or General Notes. Chemical substances are screened against the HPD Priority Hazard Lists for human and environmental health impacts. Screening is based on best available information; "Not Found" does not necessarily mean there is no potential hazard associated with the product or its contents. More information about Priority Hazard Lists and the GreenScreen can be found online: www.hpd-collaborative.org and www.greenscreenchemicals.org.

PARABIT SOLO HOT MELT MEMBRANE %: 100.0000 - 100.0000 HPD URL:

SUBSTANCE NOTES:

Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

PARABIT SOLO REINFORCING GRID**HPD URL: No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Parabit Solo Reinforcing Grid is an interwoven, open grid glass fibre reinforcement encapsulated within the Parabit Hot Melt Compound during installation.

ROOTBAR MINERAL CAPSHEET**HPD URL: No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Rootbar Mineral Capsheet is an SBS modified, polyester reinforced bituminous waterproofing capsheet surfaced with mineral slate granules with root inhibiting properties, typically used at details.

ROOTBAR SANDED CAPSHEET**HPD URL: No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Rootbar Sanded Capsheet is an SBS modified, polyester reinforced bituminous waterproofing capsheet surfaced in sand with root inhibiting properties typically used within the field area and embedded into the Parabit Hot Melt Compound during installation.

XTRA-SEAL QD BITUMEN PRIMER**HPD URL: No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Surface primer to be used on substrates prior to the application of the Parabit Hot Melt Membrane.

SIPLAST PRIMER**HPD URL: No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Surface primer to be used on substrates prior to the application of the Parabit Hot Melt Membrane.

POWER ELASTOMERIC 250 SANDED**HPD URL: No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Power Elastomeric 250 Sanded Capsheet is an SBS modified, polyester reinforced bituminous waterproofing capsheet surfaced with sand.

THERMAWELD MINERAL CAPSHEET**HPD URL: No HPD link provided**

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Thermaweld Mineral Capsheet is an SBS modified, polyester reinforced bituminous waterproofing capsheet surfaced with mineral slate granules.

- Second Party** Verification by trade association or other interested party
- Third Party** Verification by independent certifier
- Applicable facilities** Manufacturing sites to which testing applies

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator, and when available, full GreenScreen assessments. The HPD Open Standard does not provide an assessment of health impacts throughout the product life cycle. It does not provide an assessment of exposure or risk associated with product handling or use. It also does not address potential health impacts of: (i) substances used or created during the manufacturing process unless they remain in the final product, or (ii) substances created after the product is delivered for end use (e.g., if the product burns, degrades, or otherwise changes chemical composition).

The HPD Open Standard was created and is maintained and evolved by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry. The HPD Collaborative is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

A disclosure completed in compliance with the HPD Open Standard is referred to as a "Health Product Declaration," or "HPD." The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD Open Standard noted.
