

CLASSIFICATION: 09 72 19 Wall Coverings - Textile Wall Coverings

created via: HPDC Online Builder

**PRODUCT DESCRIPTION:** Spinneybeck full grain leathers are superior to top grain leathers. They are stronger. Full grain leathers have greater tensile strength and are less likely to 'puddle' than leathers which have lost the surface layers. Top grain leathers have had the upper portion of the dermis removed therefore losing the strongest, tightest, and most dense part of the hide. They are not as strong as full grain leathers and will permanently stretch over time. Whereas properly maintained full grain leather will never look worn and will outwear textiles and top grain leather many times over. Since fabrics are woven, changes in their appearance from age and use detract from their beauty. Leather will absorb body oils during use and enhance the leather's appearance over time. This improvement in appearance is called patina and it's a unique characteristic of natural leather. They are more comfortable. Full grain leathers breathe and ventilate body heat away from the body, allowing them to remain cool and comfortable in summer while not becoming cold and rigid in winter. Conversely, top grain leathers have their surfaces clogged with heavy applications of finish and will not wick away heat. In addition, they feel artificial as silicone-based fillers are used to patch holes and deep barbed wire scars and does not adjust to your body temperature nor wick away moisture. They are more beautiful. Full grain leathers produced from the highest quality of raw materials have depth of color and require less finish, allowing their natural markings to show. They are more supple. Full grain leathers are natural, supple, and provide a robust hand. This natural characteristic adds to the luxury, value, and comfort of the leather and is not evident in lower grade top grain leathers. They are longer lasting. Full grain leathers, which have all of their natural properties intact, will breathe and will maintain high moisture content and a proper pH balance. Top grain leathers receive heavy applications of finish which seal the surface. The pore structure is removed preventing the leather to breathe. They have a larger hide yield. An average of 80–90 percent yield per hide provides a lower waste factor than top grain corrected material meaning less square footage is required and a lower waste factor for cutting patterns.

**Section 1: Summary**

**Nested Method / Product Threshold**

**CONTENT INVENTORY**

**Inventory Reporting Format**

- Nested Materials Method
- Basic Method

**Threshold Disclosed Per**

- Material
- Product

**Threshold level**

- 100 ppm
- 1,000 ppm
- Per GHS SDS
- Per OSHA MSDS
- Other

**Residuals/Impurities**

Residuals/Impurities Considered in 1 of 1 Materials

**Explanation(s) provided for Residuals/Impurities?**

- Yes
- No

Are All Substances Above the Threshold Indicated:

**Characterized**  Yes  No  
Percent Weight and Role Provided?

**Screened**  Yes  No  
Using Priority Hazard Lists with Results Disclosed?

**Identified**  Yes  No  
Name and Identifier Provided?

**CONTENT IN DESCENDING ORDER OF QUANTITY**

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

Number of Greenscreen BM-4/BM3 contents..... 0  
Contents highest concern GreenScreen  
Benchmark or List translator Score..... LT-P1  
Nanomaterial..... No

**INVENTORY AND SCREENING NOTES:**

**MATERIAL | SUBSTANCE | RESIDUAL OR IMPURITY**  
**GREENSCREEN SCORE | HAZARD TYPE**

**FULL GRAIN LEATHER [ LEATHER NoGS CHROMIUM (III) OXIDE LT-P1 | SKI**  
**UNDISCLOSED NoGS ]**

**VOLATILE ORGANIC COMPOUND (VOC) CONTENT**

VOC Content data is not applicable for this product category.

**CERTIFICATIONS AND COMPLIANCE** *See Section 3 for additional listings.*

Chemicals of Concern: REACH European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals

**CONSISTENCY WITH OTHER PROGRAMS**

No pre-checks completed or disclosed

No

## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-1-standard](http://www.hpd-collaborative.org/hpd-2-1-standard)

**FULL GRAIN LEATHER**    %: 100.0000 - 100.0000    HPD URL: <https://builder-2.hpd-collaborative.org/records/4599>

PRODUCT THRESHOLD: Other    RESIDUALS AND IMPURITIES CONSIDERED: Yes

RESIDUALS AND IMPURITIES NOTES: Impurities are accounted for in the Quality Review Process

OTHER MATERIAL NOTES: Dye combinations are proprietary. Finished product complies with REACH

### LEATHER

ID: Not registered

%: 98.0000 - 99.0000    GS: NoGS    RC: None    NANO: No    ROLE: Base Material

HAZARDS:

AGENCY(IES) WITH WARNINGS:

None Found

No warnings found on HPD Priority lists

SUBSTANCE NOTES:

### CHROMIUM (III) OXIDE

ID: 1308-38-9

%: 0.0100 - 1.9900    GS: LT-P1    RC: None    NANO: No    ROLE: Tanning Process

HAZARDS:

AGENCY(IES) WITH WARNINGS:

SKIN SENSITIZE

MAK

Sensitizing Substance Sh - Danger of skin sensitization

SUBSTANCE NOTES:

### UNDISCLOSED

%: 0.0100 - 2.0000    GS: NoGS    RC: None    NANO: No    ROLE: Dye

HAZARDS:

AGENCY(IES) WITH WARNINGS:

None Found

No warnings found on HPD Priority lists

SUBSTANCE NOTES: Dye compositions are proprietary

## Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

### CHEMICALS OF CONCERN

### REACH European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals

CERTIFYING PARTY: Self-declared	ISSUE DATE: 2016-01-28	EXPIRY DATE: 2020-01-28	CERTIFIER OR LAB: None
APPLICABLE FACILITIES: ICA Spinneybeck			
CERTIFICATE URL:			
CERTIFICATION AND COMPLIANCE NOTES:			

## Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

## Section 5: General Notes

Wipe with a cool, damp cloth. For tougher soiling, use a pH-balanced soap and rinse. Repeat, if needed. Occasional use of Spinneybeck Finished Leather Cleaner, Conditioner & Protector or Finished Leather Maintenance Kit is recommended. Other leather cleaners such as saddle soap or household cleaners that may contain harsh chemicals, alcohol or ink removers should never be used.

## Section 6: References

### MANUFACTURER INFORMATION

MANUFACTURER: **Spinneybeck | FilzFelt**  
ADDRESS: **425 CrossPoint Parkway**  
**Getzville New York 14068, USA**  
WEBSITE: **<https://www.spinneybeck.com/>**

CONTACT NAME: **Peter A. Harenda**  
TITLE: **Product Testing Coordinator**  
PHONE: **716.446.2358**  
EMAIL: **[pharenda@spinneybeck.com](mailto:pharenda@spinneybeck.com)**

### KEY

**OSHA MSDS** Occupational Safety and Health Administration Material Safety Data Sheet

## Hazard Types

**AQU** Aquatic toxicity

**CAN** Cancer

**DEV** Developmental toxicity

**END** Endocrine activity

**EYE** Eye irritation/corrosivity

**GEN** Gene mutation

**GLO** Global warming

**MAM** Mammalian/systemic/organ toxicity

**MUL** Multiple hazards

**NEU** Neurotoxicity

**OZO** Ozone depletion

**PBT** Persistent Bioaccumulative Toxic

**PHY** Physical Hazard (reactive)

**REP** Reproductive toxicity

**RES** Respiratory sensitization

**SKI** Skin sensitization/irritation/corrosivity

**LAN** Land Toxicity

**NF** Not found on Priority Hazard Lists

## GreenScreen (GS)

**BM-4** Benchmark 4 (prefer-safer chemical)

**BM-3** Benchmark 3 (use but still opportunity for improvement)

**BM-2** Benchmark 2 (use but search for safer substitutes)

**BM-1** Benchmark 1 (avoid - chemical of high concern)

**BM-U** Benchmark Unspecified (insufficient data to benchmark)

**LT-P1** List Translator Possible Benchmark 1

**LT-1** List Translator Likely Benchmark 1

**LT-UNK** List Translator Benchmark Unknown (insufficient information from List Translator lists to benchmark)

**NoGS** Unknown (no data on List Translator Lists)

## Recycled Types

**PreC** Preconsumer (Post-Industrial)

**PostC** Postconsumer

**Both** Both Preconsumer and Postconsumer

**Unk** Inclusion of recycled content is unknown

**None** Does not include recycled content

## Other Terms

### Inventory Methods:

**Nested Method / Material Threshold** Substances listed within each material per threshold indicated per material

**Nested Method / Product Threshold** Substances listed within each material per threshold indicated per product

**Basic Method / Product Threshold** Substances listed individually per threshold indicated per product

**Nano** Composed of nano scale particles or nanotechnology

**Third Party Verified** Verification by independent certifier approved by HPDC

**Preparer** Third party preparer, if not self-prepared by manufacturer

**Applicable facilities** Manufacturing sites to which testing applies

---

*The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:*

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

*Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.*

*The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.*

*The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.*
