Formawall Dimension Series
by CENTRIA

CLASSIFICATION: CSI Section: 07 42 13 Insulated Metal Wall Panels

PRODUCT DESCRIPTION: Formawall Dimension Series insulated metal panels combine thermal efficiency and moisture control into one product. Dimension Series panels consist of a polyisocyanurate foam core in between a painted galvanized steel face and liner. The pressure-equalized joinery acts as the primary air, water, and vapor barrier for the wall assembly. Panel thickness, panel width, and liner gage vary on a project-by-project basis; therefore, ratios of ingredients will also vary.

### INVENTORY AND SCREENING NOTES:

Galvanized steel face and liner are protected from the elements with a PVDF paint and primer coating. Due to the wide variety of colors, thicknesses, and types of finishes offered, this HPD does not consider paints, finishes, or coatings in the materials listed. Coating ingredients can be determined on a project-by-project basis once a specific finish is determined. Any coating applied to the surfaces of these panels is coil-applied prior to the forming of the panel; as a result, no VOCs are generated at the job site due to field-painting operations. VOC content shown in Section 1 is produced by the non-curing butyl sealant used in the side-joinery and at perimeter seals. Please contact CENTRIA for more information.

### VOLATILE ORGANIC COMPOUND (VOC) CONTENT

Material (g/l): 155
Regulatory (g/l): 151

Does the product contain exempt VOCs: No
Are ultra-low VOC tints available: N/A

### CERTIFICATIONS AND COMPLIANCE

Other: Environmental Product Declaration (EPD)

**CONSISTENCY WITH OTHER PROGRAMS**

No pre-checks completed or disclosed

---

**VOLATILE ORGANIC COMPOUND (VOC) CONTENT**

Material (g/l): 155
Regulatory (g/l): 151

Does the product contain exempt VOCs: No
Are ultra-low VOC tints available: N/A
This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-standard

---

**GALVANIZED STEEL LINERS**

**MATERIAL THRESHOLD:** Per GHS SDS

**RESIDUALS AND IMPURITIES CONSIDERED:** Yes

**RESIDUALS AND IMPURITIES NOTES:** G90 galvanized steel may contain trace amounts of impurities and other residual metals from recycling processes.

**OTHER MATERIAL NOTES:** Recycled content of steel only is 19.8% post-consumer, 14.4% pre-consumer per the latest data from the Steel Recycling Institute. The overall total recycled content of the panel will vary based on panel thickness, panel module, and liner gages.

---

**STEEL (STEEL)**

**ID:** 12597-69-2

**%:** 99.9000 - 100.0000

**GS:** NoGS

**RC:** Both

**NANO:** No

**ROLE:** Steel Alloy

**HAZARDS:**
- None Found

**SUBSTANCE NOTES:** See material description for recycled content percentages. The overall total recycled content of the panel will vary based on panel thickness, panel module, and liner gages. Steel consists of metal alloys with the following CAS numbers: 7439-89-6, 7439-96-5, 7440-47-3, 7440-21-3, 7440-02-0, 7440-62-2, and 7440-44-0.

---

**ZINC (ZINC)**

**ID:** 7440-66-6

**%:** 0.0000 - 0.1000

**GS:** LT-P1

**RC:** Both

**NANO:** No

**ROLE:** Galvanized coating of steel

**HAZARDS:**
- **ACUTE AQUATIC**
  - EU - R-phrases
  - R50 - Very Toxic to Aquatic Organisms
- **ACUTE AQUATIC**
  - EU - GHS (H-Statements)
  - H400 - Very toxic to aquatic life
- **CHRON AQUATIC**
  - EU - GHS (H-Statements)
  - H410 - Very toxic to aquatic life with long lasting effects
- **ENDOCRINE**
  - TEDX - Potential Endocrine Disruptors
  - Potential Endocrine Disruptor
- **MULTIPLE**
  - German FEA - Substances Hazardous to Waters
  - Class 2 - Hazard to Waters
- **PHYSICAL HAZARD (REACTIVE)**
  - EU - GHS (H-Statements)
  - H250 - Catches fire spontaneously if exposed to air
- **PHYSICAL HAZARD (REACTIVE)**
  - EU - GHS (H-Statements)
  - H260 - In contact with water releases flammable gases which may ignite spontaneously

**SUBSTANCE NOTES:** See material notes for recycled content of steel.
Polyisocyanurate foam insulation

Material Threshold: Other
Residuals and Impurities Considered: Yes

Residuals and Impurities Notes: No halogen-based ingredients are intentionally added to the foam mixture. Prior to the foam reaction during panel manufacturing, ingredients are mixed in liquid form within tanks. The final product may contain trace residuals of halogenated compounds remaining from previous products mixed in the same tank.

Other Material Notes: Polyisocyanurate foam free of intentionally-added halogenated compounds. This particular foam blend was created uniquely for this product; therefore, no specific CAS# is applicable. The closest resemblance is CAS# 27026-93-3. Approximate percentage amounts of substances of the post-reaction foam were derived from reaction chemistry.

**Polyisocyanurate Foam**

### HAZARDS:

#### AGENCY(IES) WITH WARNINGS:

**Chron aquatic**
- EU - GHS (H-statements): H411 - Toxic to aquatic life with long lasting effects

**Mammalian**
- EU - GHS (H-statements): H304 - May be fatal if swallowed and enters airways

**Multiple**
- German FEA - Substances Hazardous to Waters: Class 2 - Hazard to Waters

**Physical hazard (reactive)**
- EU - GHS (H-statements): H224 - Extremely flammable liquid and vapour

**Substance notes:** Ingredient in blowing agent component of foam system. Approximate percentage amounts of substances of the post-reaction foam were derived from reaction chemistry.

**Potassium Salt**

**Substance notes:** Component of polyol blend that remains after the foam reaction. Approximate percentage amounts of substances of the post-reaction foam were derived from reaction chemistry.

**N-Pentane**

**Substance notes:** Ingredient in blowing agent component of foam system. Approximate percentage amounts of substances of the post-reaction foam were derived from reaction chemistry.

**Non-curing butyl sealant**

**Material threshold:** Per GHS SDS

**Residuals and impurities considered:** Yes

**Residuals and impurities notes:** Residual oils may contain petroleum.

**Other material notes:** Material percentages only account for factory-installed butyl located in the panel joinery. Actual amount of
butyl used in the field may be higher depending on project-specific sealing conditions. VOC content of sealant given in Product VOC Content Data in Section 1 above.

Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

**SUBSTANCE NOTES:** Ingredient in non-curing butyl sealant.

### Environmental Product Declaration (EPD)

**CERTIFYING PARTY:** Third Party

**APPLICABLE FACILITIES:** Applies to Formawall Dimension Series panels manufactured in Sheridan, AR.

**CERTIFICATE URL:**
https://spot.ulprospector.com/en/na/BuiltEnvironment/Detail/31685/683268/Formawall-Dimension-Series?st=1&sl=52713287&crit=a2V5d29yZDpbY2VudHJpYV0%3d&ss=2&k=centria&t=centria

**CERTIFICATION AND COMPLIANCE NOTES:** Environmental Product Declaration (EPD) developed in accordance with ISO 14025.

---

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

**ALUMINUM EXTRUSIONS**

**HPD URL:** No HPD available

**CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:**

Extrusions used at base, head, sill, and jamb conditions are made from 6063-T5 alloy aluminum. Type and amount of extrusions is dependent on job-specific conditions. Approximate recycled content is 30.5% post-consumer, 35.4% pre-consumer.

**GALVANIZED STEEL CLIPS**

**HPD URL:** No HPD available

**CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:**

Formawall Dimension Series
hpdrepository.hpd-collaborative.org
Clips used for attaching panels to support substrate made of bare G90 galvanized steel. Approximate recycled content is 19.8% post-consumer, 14.4% pre-consumer per latest Steel Recycling Institute data.

### Section 5: General Notes

Galvanized steel face and liner are protected from the elements with a PVDF paint and primer coating. Due to the wide variety of colors, thicknesses, and types of finishes offered, this HPD does not consider paints, finishes, or coatings in the materials listed. Coating ingredients can be determined on a project-by-project basis once a specific finish is determined. Any coating applied to the surfaces of these panels is coil-applied prior to the forming of the panel; as a result, no VOCs are generated at the job site due to field-painting operations. VOC content shown in Section 1 is produced by the non-curing butyl sealant used in the side-joinery and at perimeter seals. Please contact CENTRIA for more information.

### Inventory Methods:

- **Nested Method / Material Threshold**: Substances listed within each material per threshold indicated per material.
- **Nested Method / Product Threshold**: Substances listed within each material per threshold indicated per product.
- **Basic Method / Product Threshold**: Substances listed individually per threshold indicated per product.

### Nano
Composed of nano scale particles or nanotechnology

### Third Party Verified
Verification by independent certifier approved by HPDC

### Preparer
Third party preparer, if not self-prepared by manufacturer

### Applicable facilities
Manufacturing sites to which testing applies

---

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
