# Panel Rey Exterior Rey® Type X 5/8" by Panel Rev S.A.

# **Health Product** Declaration v2.1.1

created via: HPDC Online Builder

CLASSIFICATION: 09 29 00

PRODUCT DESCRIPTION: Panel Rey® Exterior Coating and Fire Resistant Drywall Exterior Rey X is specially designed to be installed in the external part of the frame of walls or mountings, under other external application materials, such as wood, metal, brick facades, stucco, etc. This product is a product with a fireproof core essentially made of gypsum and specially treated to be waterproof, and reinforced with the addition of high-temperature resistant fibers and special additives to provide a higher resistance and performance when used with previously evaluated products. It is covered on both sides with 100% recycled paper. The paper, in the front, covers the beveled edges to strengthen and protect the core. The ends are carefully ground in a square cut. Panel Rey ® Exterior Rey X Drywall is offered in a wide variety of lengths and standard thicknesses for it to be used for construction purposes. Panel Rey products do not contain asbestos.

## Residuals/Impurities

Residuals/Impurities Considered in 6 of 6 Materials

Explanation(s) provided for Residuals/Impurities? Yes O No

All Substances Above the Threshold Indicated Are:

O Yes Ex/SC O Yes O No Characterized

% weight and role provided for all substances.

**Screened** ○ Yes Ex/SC Yes No

All substances screened using Priority Hazard Lists with results disclosed.

C Yes Ex/SC C Yes C No Identified

One or more substances not disclosed by Name (Specific or Generic) and Identifier and/ or one or more Special Condition did not follow guidance.

### CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

# **INVENTORY AND SCREENING NOTES:**

This Health Product Declaration (HPD) was completed in accordance with the HPD Standard version 2.1, and discloses hazards associated with all substances present at or above 100 parts per million (ppm) in the finished the product, along with the role and percent weight. Therefore, this HPD is consistent with the LEED v4 MR credit Building Product Disclosure and Optimization: Material Ingredient Reporting (Option 1).

# **VOLATILE ORGANIC COMPOUND (VOC) CONTENT**

VOC Content data is not applicable for this product category.

### CERTIFICATIONS AND COMPLIANCE See Section 3 for additional listings.

VOC emissions: Greenguard

Other: Type III Environmental Product Declaration

### **CONSISTENCY WITH OTHER PROGRAMS**

No pre-checks completed or disclosed.

# Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances
  created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
