Panel Rey Fire Rey 1/2", 5/8" by Panel Rey S.A.

Health Product Declaration v2.1.1

created via: HPDC Online Builder

CLASSIFICATION: 09 29 00

PRODUCT DESCRIPTION: Panel Rey's Fire resistant drywall Type X is a product with a fireproof core essentially made of gypsum and reinforced with the addition of high-temperature resistant fibers. This provides a higher strength and fire resistance to the drywall when it is used in previously evaluated assemblies. The drywall is covered on both sides with 100% recycled paper. The paper, on the front, covers the beveled edges to strengthen and protect the core. The ends are square cut and finished smooth. Panel Rey Fire-Resistant Drywall is offered in a wide variety of standard lengths and thickness of ½" and 5/8". Panel Rey products do not contain asbestos. Fire resistant drywall is designed to be used exclusively in interiors. Avoid exposure to temperatures higher than 125° F/ 52° C, for example, close to burners, furnaces or heaters. Also, avoid exposure to excessive or continuous moisture, before, during, and after its installation, for example, close to pools, saunas or steam rooms. Eliminate moisture sources immediately. Drywall is not a structural element and must not be used as the basis of a nailing base. The gap in the ceiling frames must not exceed the recommendations specified in the ASTM C-840 standard (for 5/8" of Fire Resistant Drywall 16" o/c parallel application to the frame, and 24" perpendicularly applied).

INVENTORY AND SCREENING NOTES:

This Health Product Declaration (HPD) was completed in accordance with the HPD Standard version 2.1, and discloses hazards associated with all substances present at or above 100 parts per million (ppm) in the finished the product, along with the role and percent weight. Therefore, this HPD is consistent with the LEED v4 MR credit Building Product Disclosure and Optimization: Material Ingredient Reporting (Option 1).

CERTIFICATIONS AND COMPLIANCE See Section 3 for additional listings. VOC emissions: Greenguard Other: Type III Environmental Product Declaration

C Yes No PREPARER: Self-Prepared VERIFIER: VERIFICATION #: SCREENING DATE: 2019-02-11 PUBLISHED DATE: 2019-02-21 EXPIRY DATE: 2022-02-11 This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
