Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-1-standard

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Durasein solid surface materials consist of reacted monomers and resins, mineral fillers and pigments manufactured as sheet material, sinks and bathtubs. Durasein solid surface materials are solid, non-porous, homogeneous, renewable and are free from internal strengthening fibers. They comply with ISFA Standard Type solid surface materials and are designed for horizontal, vertical, wet, and dry applications. They do not require a full substrate to perform in horizontal applications. The versatility of this material is exemplified by its inclusion in the following Product Classifications: 06 61 00 Wood, Plastics and Composites; 06 61 16 Solid Surfacing Fabrications; 07 42 63 Fabricated Wall Panel Assemblies; 07 46 63 Fabricated Panel Assemblies with Siding; 10 11 43 Visual Display Wall Panels; 10 14 00 Signage; 10 21 13 Toilet Compartments; 10 21 16 Shower and Dressing Compartments; 10 25 13 Patient Bed Service Walls; 11 42 16 Food Preparation Surfaces; 11 74 00 Dental Equipment; 12 35 00 Specialty Casework; 12 36 61.16 Solid Surfacing Countertops; 12 51 83 Custom Office Furniture; 13 12 00 Fountains; 13 21 13 Clean Rooms; 14 27 13 Custom Elevator Cab Finishes; 22 41 00 Residential Plumbing Fixtures; 22 42 00 Commercial Plumbing Fixtures and 22 43 00 Healthcare Plumbing Fixtures.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
